

# Understanding Payor Drug Use Management Initiatives

## ► The U.S. health care system is fragmented and diverse

Data access differs with each type of payor

Health plan	Pharmacy benefits manager (PBM)	Integrated delivery network	Self-insured employer	CMS
Pharmacy data (real time/daily) Medical data (4-6 month lag)	Pharmacy data (real time/daily) Medical data* (4-6 month lag)	EMR (real time) Pharmacy data (real time) Medical data (real time)	Pharmacy data (monthly-quarterly) Medical data (4-6 month lag)	Pharmacy & medical data access depends on state Medicaid program and Medicare coverage

### Incentives may be different for different types of payors.

Coverage decisions made by payors are influenced by many factors such as line of business, employer purchasing decisions, and the need to provide competitive offerings. Such factors also impact the degree to which payors make decisions to spend today to save money in the future.

CMS = Centers for Medicare & Medicaid Services

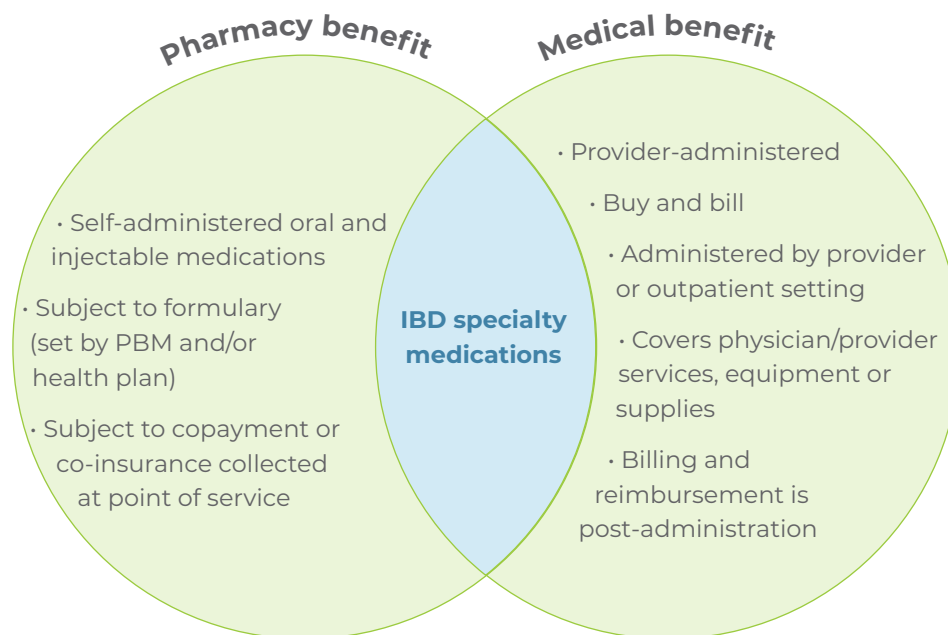

EMR = Electronic medical record

\*PBMs and specialty pharmacies may have access to medical data if provided by or vertically integrated with the health plan.

### Lines of business vary with each payor

## ► IBD drugs may be covered via the pharmacy benefit or the medical benefit<sup>1-2</sup>

**Goal: To ensure appropriate medication use**

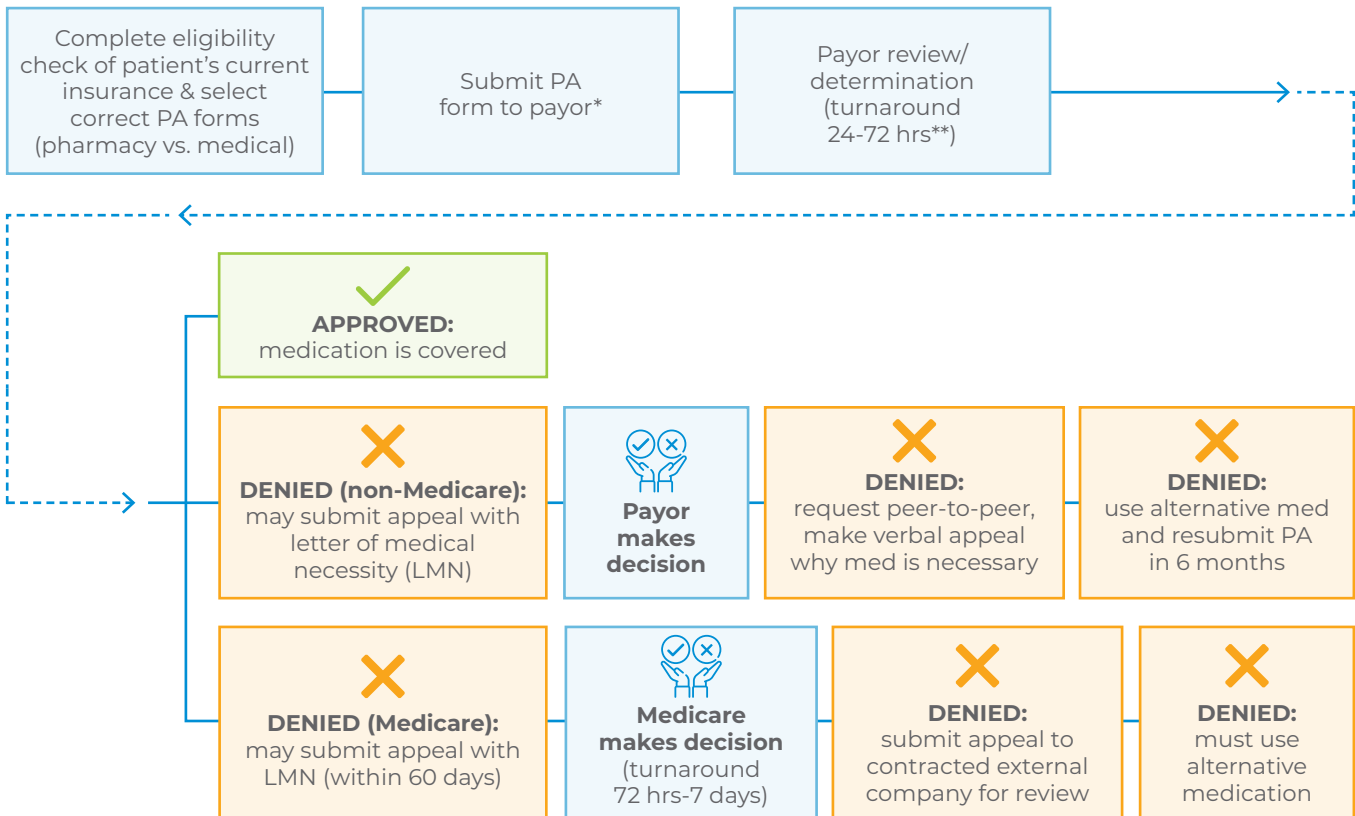

Common utilization management strategies:<sup>3</sup>

	<b>Prior authorization (PA):</b> Allows clinical review ensuring appropriate use
	<b>Step therapy:</b> Requires lower-cost, first-line therapies
	<b>Quantity limits:</b> Assures appropriate dosing, prevents waste
	<b>Duration limits:</b> Limits how long a therapy is covered by insurance
	<b>Channel management:</b> Limits to specific pharmacies or providers

Utilization management strategies for a given drug take into account:

► **Prior authorization process<sup>4</sup>**

**Document every step of all PAs**

\*Consider providing complete medication history, including past failed treatments; letter of medical necessity; guidelines and/or other reputable sources with PA form.

\*\*Expedited request based on condition and patient status turnaround 24 hours; 72 hours is standard turnaround.

## ► Tips for successful PAs<sup>4</sup>

 <p>Identify top 2-3 payors in your practice. Be familiar with formularies, PA processes, and policies.</p>	 <p>Obtain a copy of payor formularies.</p>	 <p>Identify a single point of reliable contact for each top payor.</p>	 <p>Dedicated staff person(s) to handle PAs in the practice can develop relationships with payor contacts.</p>	 <p>AGA is a resource.</p>	 <p>Patient can assist in advocacy and following up with payor.</p>

## ► Appeals (redetermination) process tips<sup>4</sup>

- Appeal within 60 days for Medicare\*
- Emphasize severity of patient's disease and consequences of ineffective therapy
- Communicate the total cost of care (e.g., risk of hospitalization) if the disease progresses
- Outline why requested treatment is more appropriate for patient (contraindications, safety, intolerance)
- If patient is needle phobic, reference possibility of non-adherence with injectable medications
- Provide additional data (progress notes, labs, endoscopic reports, imaging results and past/current therapies)
- Cite society guidelines that support requested treatment
- Keep patient apprised of status; they may be able to help with follow-up

\*Appeal timeline may differ with other payors

## ► Supporting documentation for redetermination<sup>4</sup>

- Severity of disease
- Markers of active disease
- Previous therapies used and related outcomes
- Safety, intolerance or contraindications to other available medications
- Data from recent studies and clinical trials
- Describe how limiting access to requested medication may impact patient (disease progression, increased costs, decreased quality of life)

## ► Key messages

- Know the top payors in the area and their corresponding formulary, PA processes, and policies.
- If possible, have dedicated staff to handle PAs and other utilization management requirements.
- By keeping the patient updated on the status of approval, they can advocate for themselves with the payor.
